

BeautyLash Sensitive Tinting Kit medium brown

Eyelash and eyebrow tint
Developer Gel, Colour Gel

Perfectly styled eyelashes and -brows – suited even for sensitive eyes & skin!

Be perfectly styled in only 3 minutes! The new 2-step tinting system allows you to tint eyelashes and eyebrows on your own easily and safely. This way your eyelashes will appear longer, your eyebrows will be enhanced and will have received a clear and defined outline. Whether you are on holiday, doing sports or in everyday-life, you are perfectly styled around the clock without having to use make-up.

- Dermatologically & ophthalmologically tested.
- Application in just 3 minutes.
- Lasts up to 6 weeks, smudge- and waterproof.

Target group:

- BeautyLash medium brown tints every hair in a warm brown tone.
- Especially recommended for light brown and blonde hair.
- Completely covers up grey or white hair.

Application:

1) Remove contact lenses. Clean eyelashes and eyebrows before tinting with an oil-free eye make-up remover. For an optimal tinting result, lashes and brows have to be dry and non-greasy.

Take two eye protection papers and apply fat skin cream to the raw side of the protection papers. To avoid staining the skin while tinting, press the eye protection papers gently below the lower lash lines. Protect the rest of the skin in the eye-area by applying cream to the upper eyelids and around the eyebrows. Please be careful not to put cream on the hair that is to be tinted.

2) Open (1) Colour Gel and press a pea-sized amount of the product into one of the deepening's of the plastic dish. Apply the product with the brush to your lashes like you would apply mascara. Afterwards also apply the product from above to the lash line, so that every hair from root to tip is completely and evenly covered with Colour Gel.

In case, you use the same colour for your eyebrows, you can apply the colour with the same brush in direction of hair growth to your eyebrows. Application time: 2 minutes.

3) The Colour Gel is absorbed by the hair. After two minutes, remove residues first from your eyebrows, then from your lashes with a dry cotton swab or a cosmetic tissue by wiping the lashes between thumb and index finger. Remove the colour as gently and thoroughly as possible.

4) Press a pea-sized amount of Developer Gel out of tube (2) into the second deepening of the plastic dish. Apply the Developer Gel with the application stick to eyelashes and eyebrows. They should be completely covered from root to tip. Please note, that the gel should be transparent when getting in contact with hair; therefore please wipe the application stick with a cosmetic tissue before using it again. Work precisely in order to avoid staining the skin.

Application time: 1 minute.

5) After the application time, remove the Developer Gel with a moist cotton pad from your eyebrows. Afterwards remove the eye protection papers and wipe off the rest of the Developer Gel from your lashes.
